Sarath Chandra Khandavilli

Film Nagar, Hyderabad, Telangana | +91 9573395235 | sarathkhandavilli@gmail.com | LinkedIn | GitHub | Portfolio

Education

Malla Reddy University — Hyderabad
Bachelor of Technology in Computer Science | CGPA – 8.67 — *Sep 2021 – April 2025*

Tirumala Junior College — Rajamahendravaram
Intermediate in Mathematics, Physics & Chemistry | Percentage – 97.6 — *Jun 2019 – May 2021*

Maharshi Vidya Nikethan — Atreyapuram
SSC | CGPA – 9.8 — *Jun 2018 – May 2019*

Skills

Languages: Java, Python, TypeScript, JavaScript, SQL, HTML, CSS
Frameworks: Spring Boot, React.js, Tailwind CSS, ShadCN
Developer Tools: Git, GitHub, Docker, Postman
Cloud & Databases: AWS, Supabase, Firebase, PostgreSQL, MySQL
Non-Technical Skills: Problem Solving, Critical Thinking, Team Player

Experience

Veltris — Hyderabad, India

Trainee Engineer (Full Stack Developer) — *Dec 2025 – Present*

RISE (HRTech Platform)

- Working on employee skill evaluation through coding assessments and communication analysis.
- Enhanced UI/UX and developed features using **React.js**, **Tailwind CSS**, and **ShadCN**.
- Integrated AI-based code analysis and implementing audio processing for communication assessment.
- Collaborated with team to translate business requirements into features and maintained code quality.

Trainee Intern — *Jun 2025 – Dec 2025*

Tele Analyzer

- Developed a web application for PCAP data analysis and network traffic visualization.
- Built responsive UI and dashboards using **React.js**, **Tailwind CSS**, and **Chart.js**.
- Integrated frontend with backend APIs and ensured cross-device responsiveness.

Learning Management System (LMS)

- Developed role-based modules using **React.js**, **Spring Boot**, and **PostgreSQL**.
- Implemented JWT authentication and optimized backend using Redis caching.

Projects

PM Arena – LeetCode for Product Managers | *React.js, Supabase* | GitHub

- Designed and developed a multi-tenant SaaS platform for Product Managers to practice real-world product problem solving.
- Implemented secure authentication, role-based access control (SUPER_ADMIN, ADMIN, EMPLOYEE) and tenant-based architecture using **Supabase Auth** and **Row Level Security (RLS)**.
- Built dynamic problem-solving workflows with structured solution submission, scoring, and Excel bulk upload for admins.
- Developed modern responsive UI with interactive dashboards, leaderboard, and consistent design system.

Salon Appointment Booking System | *React.js, Redux, Spring Boot, Microservices, MySQL* | GitHub

- Developed a full-stack salon appointment booking application with role-based access for customers, staff, and admins.
- Built backend using **Spring Boot Microservices**, **JWT** authentication, and **Keycloak** for secure authorization.
- Implemented real-time features using WebSocket and message queuing with RabbitMQ for appointment notifications.
- Integrated **Razorpay** payment gateway and deployed services using Docker for improved scalability.
- Developed responsive frontend with **React.js**, **Redux** for state management, and seamless API integration.

Achievements & Certifications

- Scored 71% in TCS ION NQT. SCORECARD
- Achieved a GeeksforGeeks rating of 1641.
- Solved 300+ DSA problems on coding platforms: GFG and LeetCode.
- Data Analytics with Python. NPTEL
- Programming in Java. NPTEL
- Work Smarter with Excel. Coursera

Extracurricular Activities

- Participated in CodeQuezt Contest (Data Structure and Algorithm) hosted by Naukari Campus.
- Participated in Adobe GenSolve Hackathon.
- Participated in Coding Contest at Malla Reddy University.
- Participated in Agile & Scrum Workshop at Malla Reddy University.
- Participated in Tech-Quiz at Malla Reddy University.
